TikTok

1. Folders
Content is grouped into folders by topic — like "Recipes" or "Clinic Tips." You open a folder first, then pick a video inside it.

2. Search List
A search bar at the top, with all videos listed below in one long list. You scroll or type to find what you want.

3. Simple Video Screen
Just one big video, with a swipe-up motion to do something next (like watching the next video or adding a new one). No folders, no searching — just one thing at a time.
